

# Peoria County Environmental Corridor Study

Tom Gerend, Planning Program Manager, Tri-County Regional Planning Commission

# Study Goals

- **Identify environmentally significant sites within study area**
- **Develop land use recommendations for sustainable development at environmental corridors**

# Inventory Partners

## **Educational Institutions:**

Bradley University  
IL Central College  
Peoria Academy of Science

## **Governmental Entities:**

Peoria County P&Z  
City of E. Peoria  
Fondulac Park District  
Peoria Park District  
Pekin Park District  
Peoria Farm Bureau  
Peoria Co. Soil & Water

## **Consultants:**

MacTec, Inc.  
University of Illinois

## **State Agencies:**

IL Natural History Survey  
IL Nature Preserves  
Commission  
IL History Survey

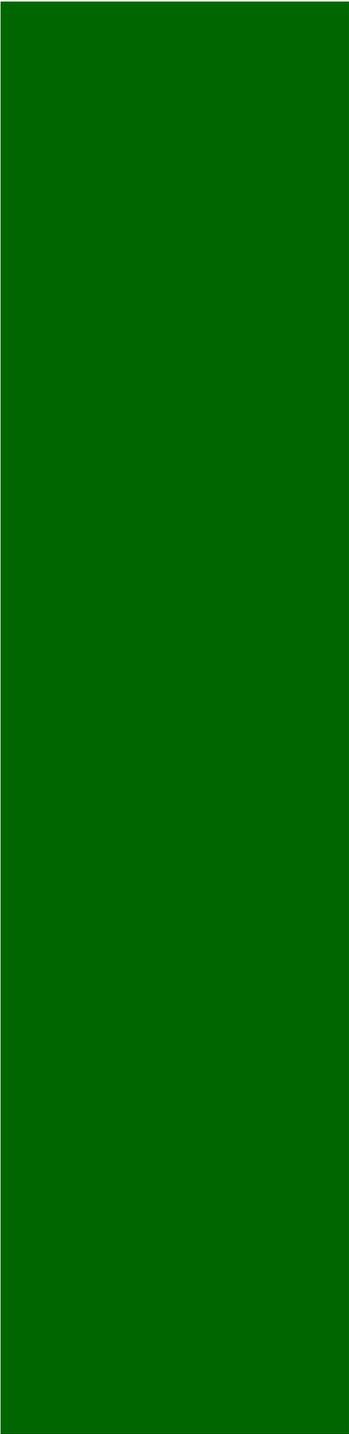

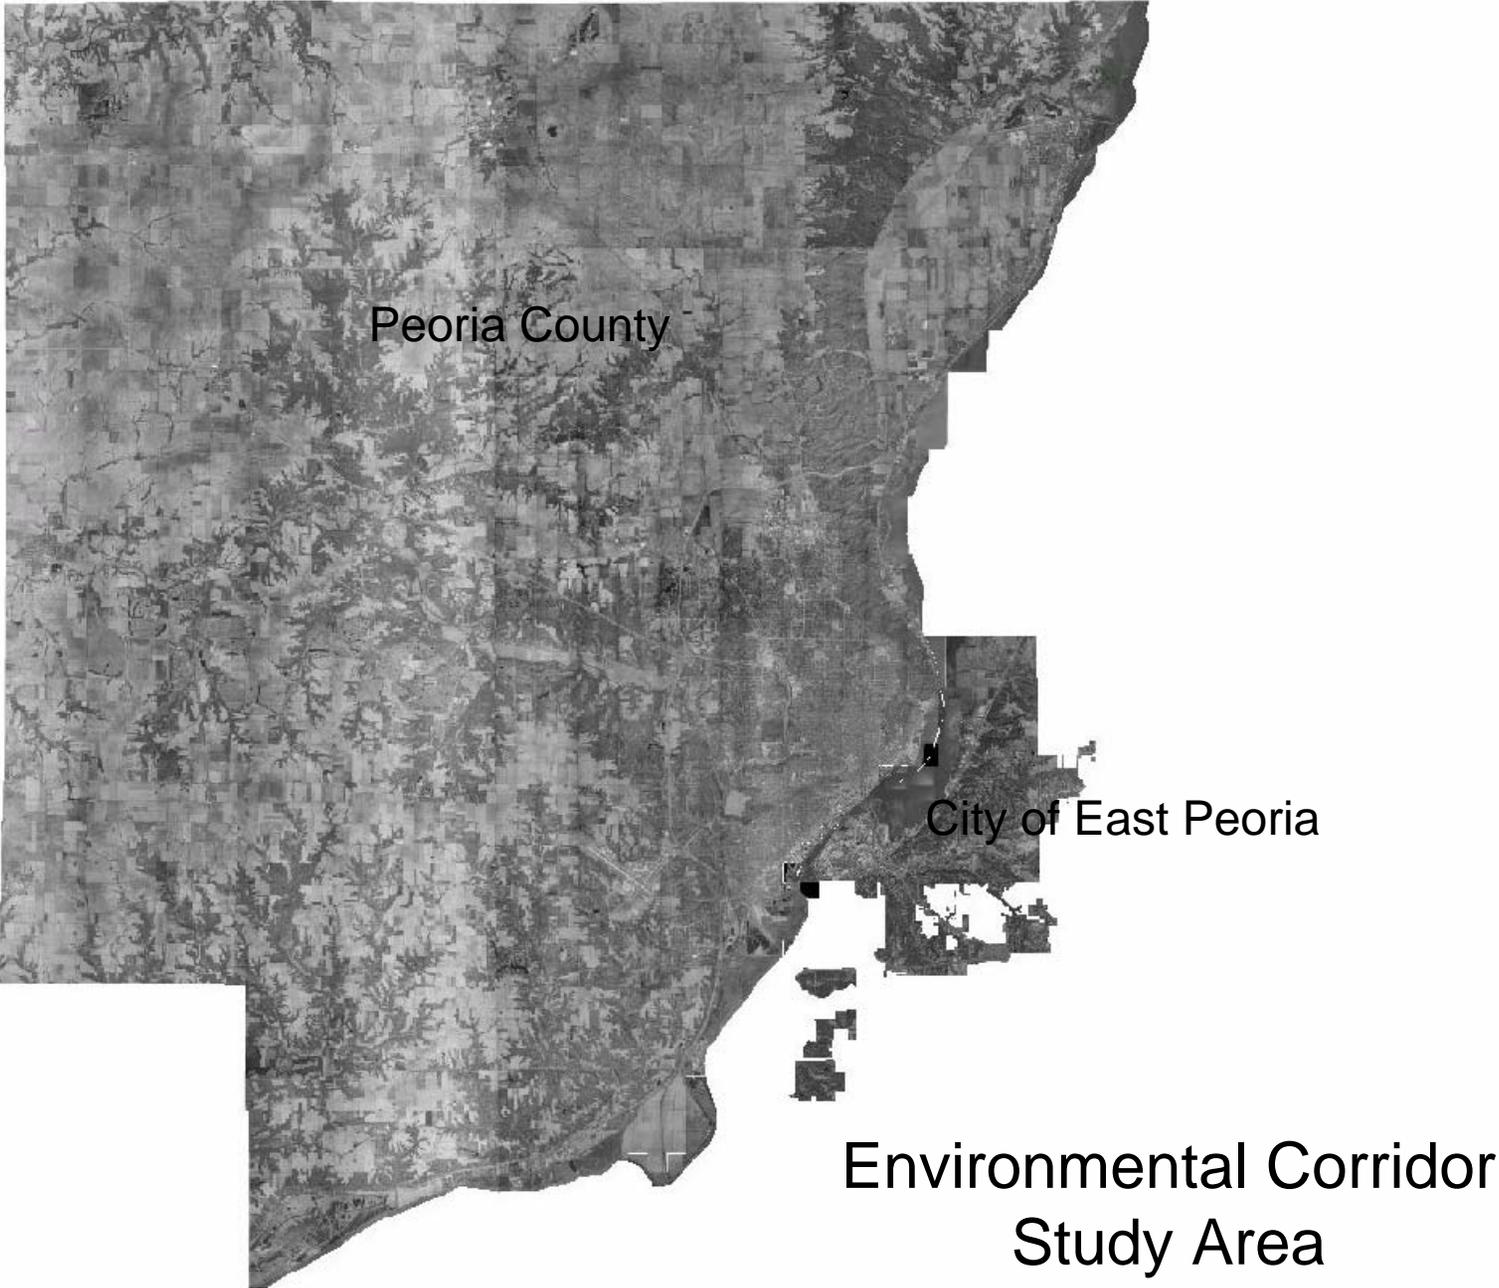

## **Federal Agencies:**

US Fish & Wildlife Service  
US Dept. of Agriculture

## **Environmental Groups:**

Peoria Audubon Society  
Trees Forever  
Tri-County Riverfront Action  
Forum  
HOI Sierra Club

*Environmental Indicators*

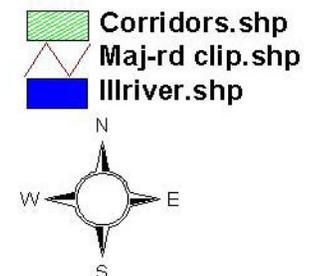

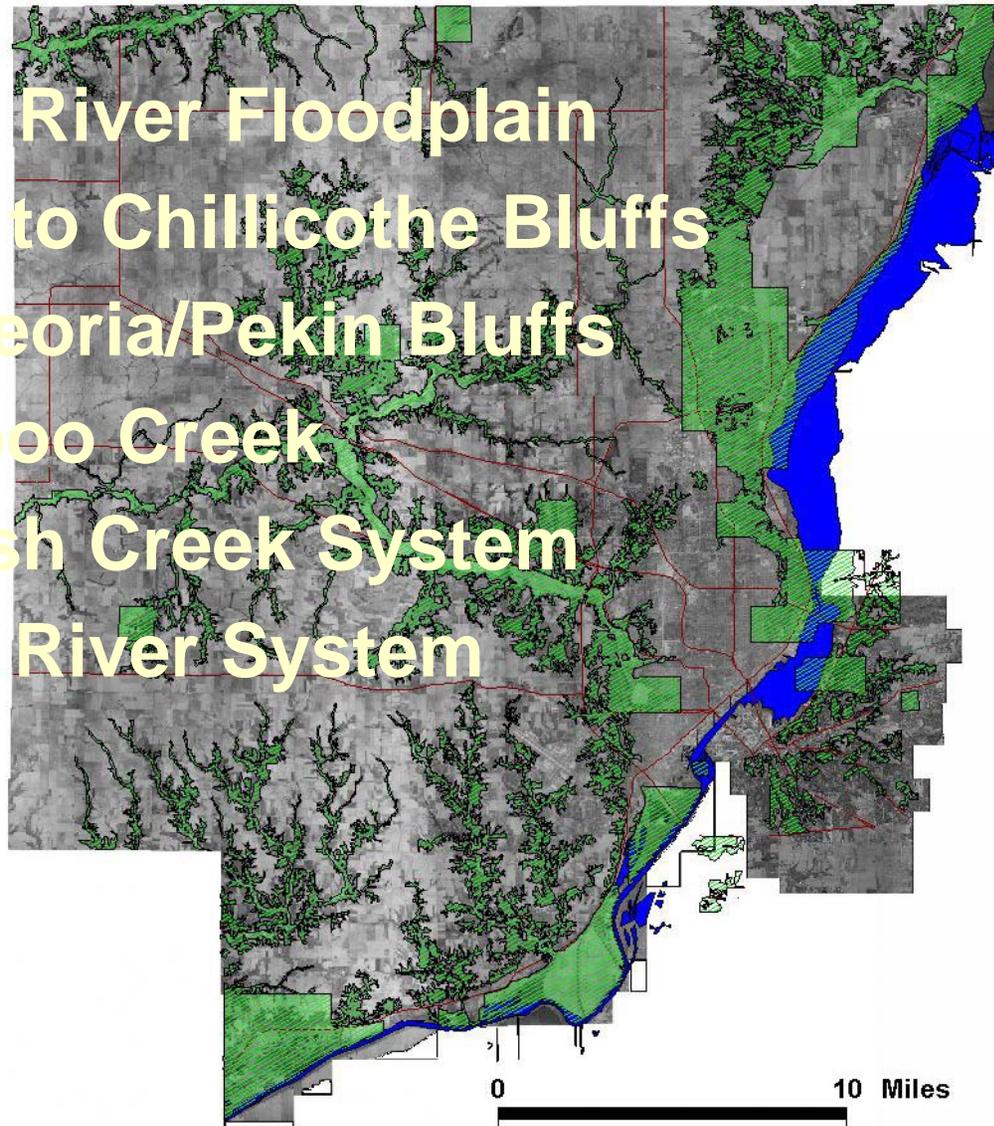

nificant???

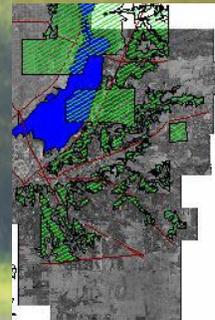

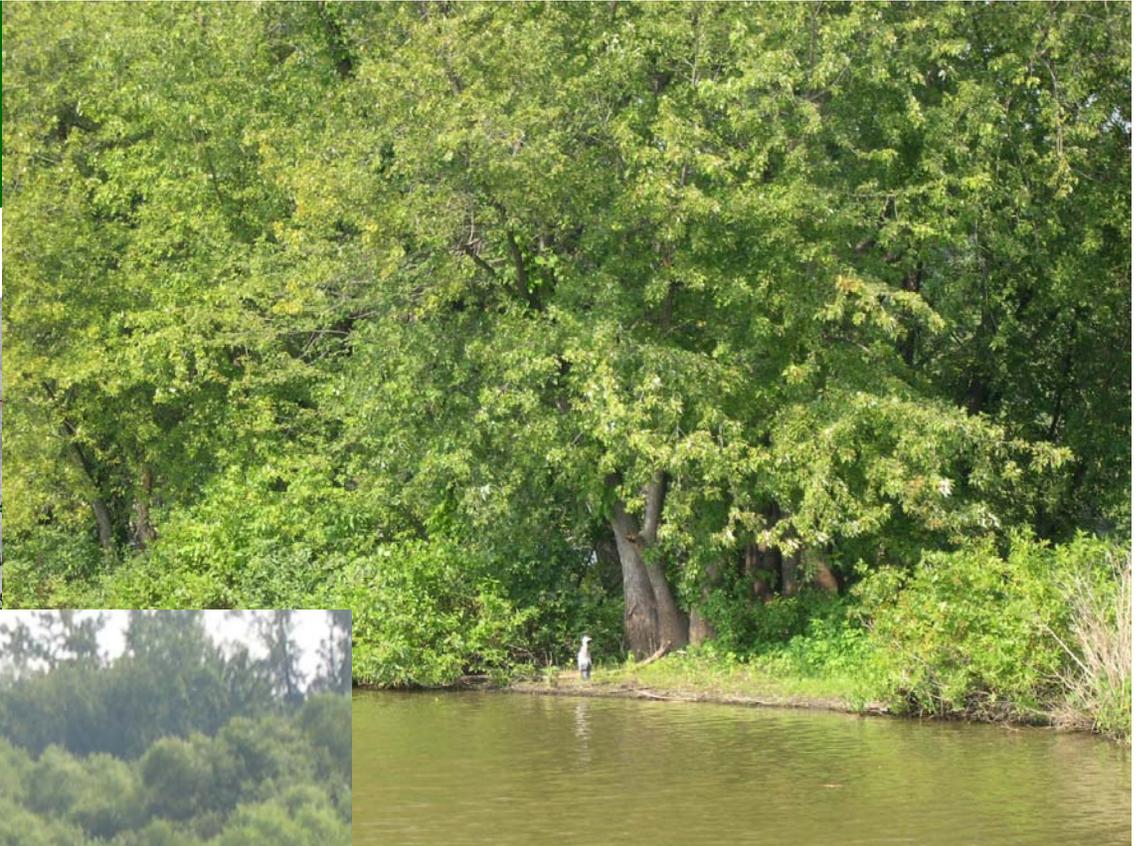

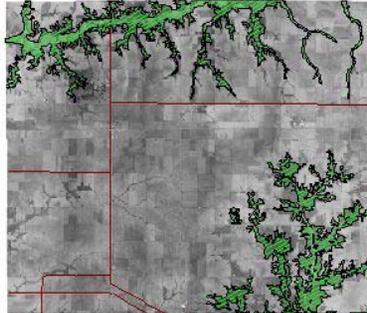

# Environmental Corridors

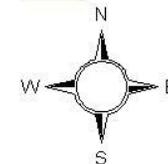

- Illinois River Floodplain
- Peoria to Chillicothe Bluffs
- East Peoria/Pekin Bluffs
- Kickapoo Creek
- LaMarsh Creek System
- Spoon River System

# UIUC- Habitat Fragmentation Model

- Identifies habitat required for certain species
- Provides habitat fragmentation analysis:

- Effect on habitat due to various economic trends
- Effect on habitat from land use change and public policy choices

# Model Scenarios

- Business as usual (baseline economy/policies- no change)
- Economic Growth- 20% Gross Regional Product
- Economic Decline- loss of 15,000 jobs
- High Growth Contained- FPA (sewer service)
- High Growth Redirected- Ag. Preservation
- High Growth with Bluff Protection

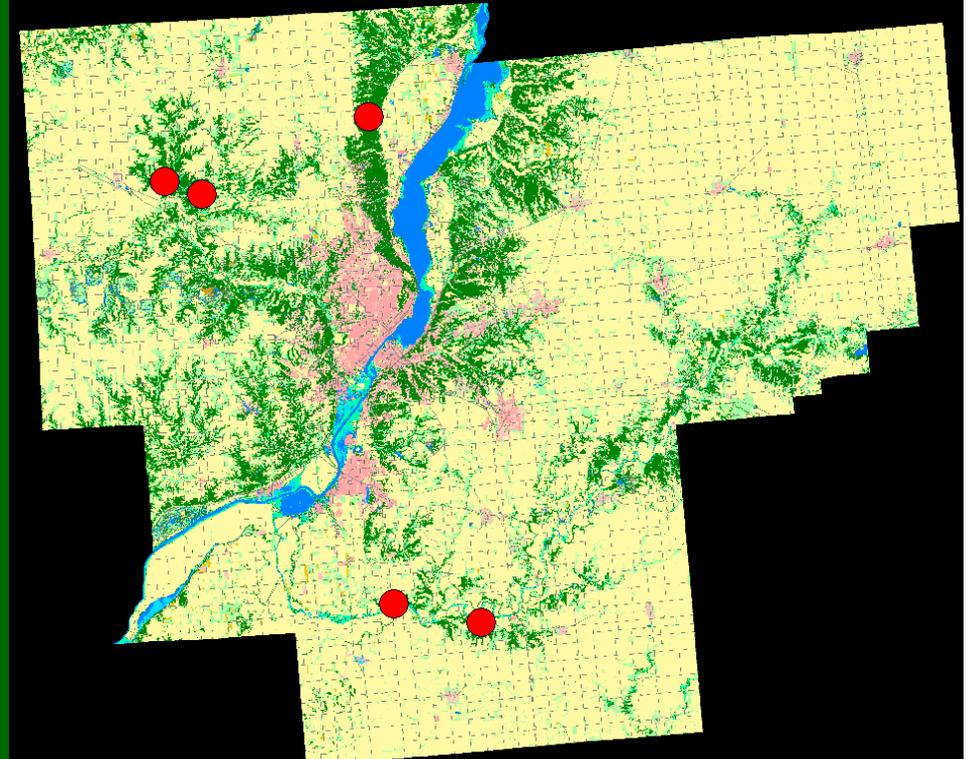

# Species for Model

- Bobcat (Canary in the Coal Mine)
- Wood Thrush

# The Bobcat in Peoria

- Bobcat is a habitat generalist, not critically affected by fragmentation
- Bobcats are present in Peoria county
  - 3 recorded sightings
  - Medium abundance

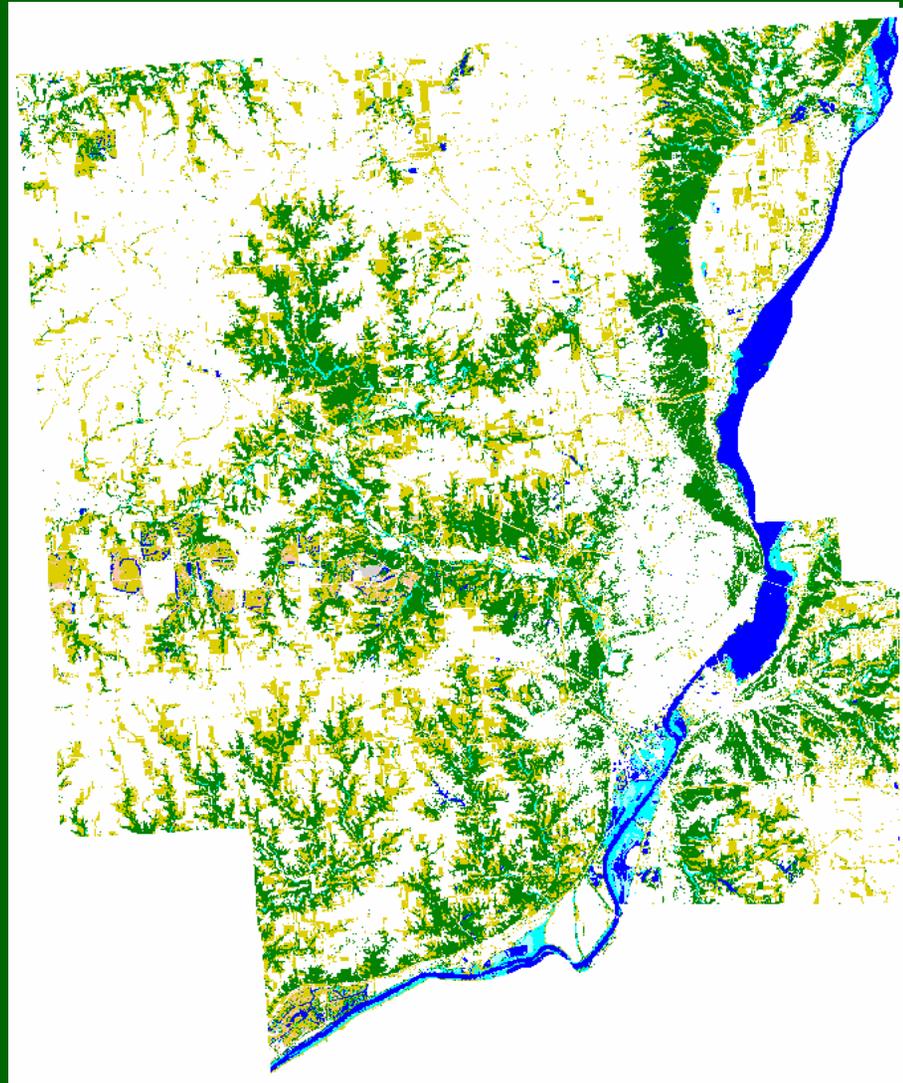

# Bobcat Habitat

## Essential habitat:

- Forest
- shrubland

## Hunting habitat:

- bare rock
- transitional
- orchards
- grassland
- pasture
- Wetlands

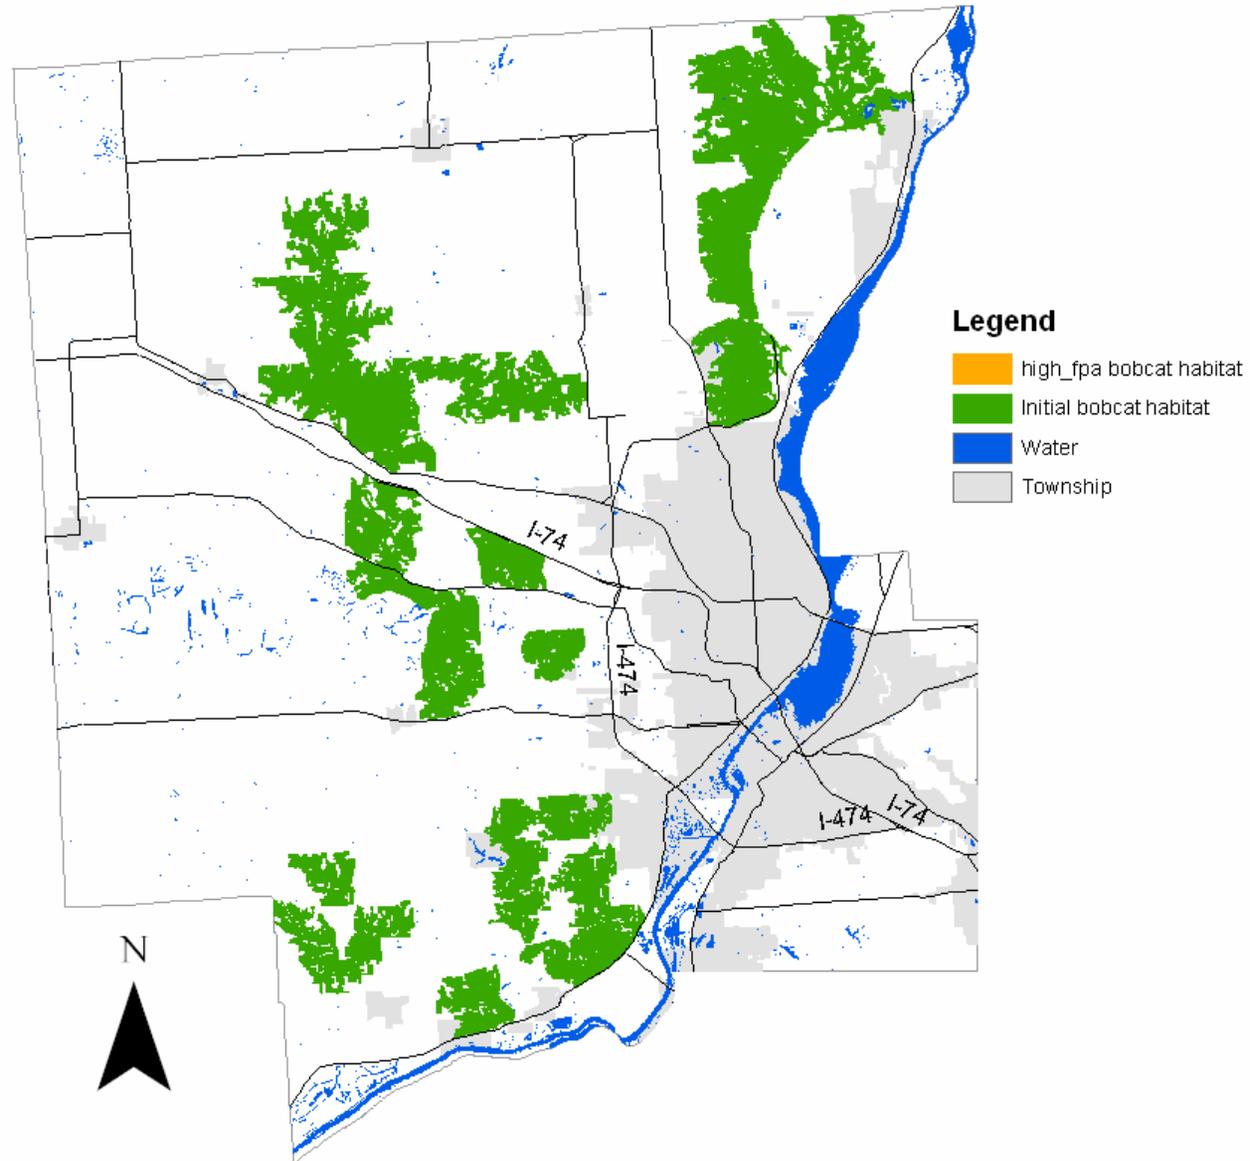

# Approach

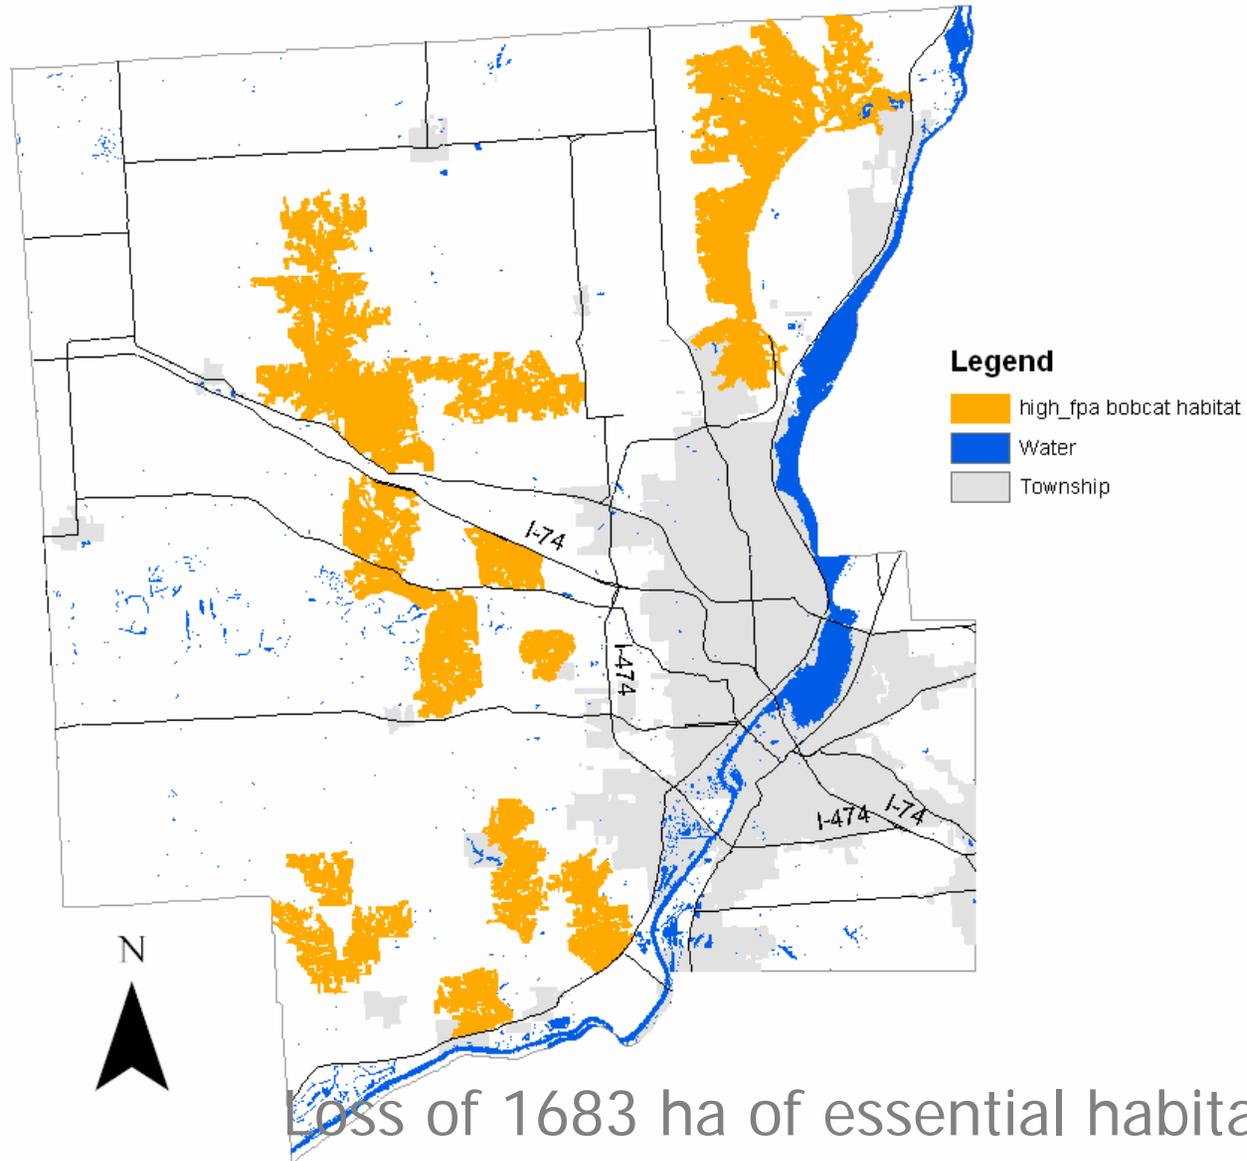

- Combining the 3 themes that define bobcat habitat:
  - Forest:  $> 1.89 \text{ km}^2$  (high 2.7, low 1.26)
  - Core habitat  $> 2.4 \text{ km}^2$  (high 3.2, low 1.8)
  - Home range  $> 16 \text{ km}^2$  (high 18.2 low 14.8)

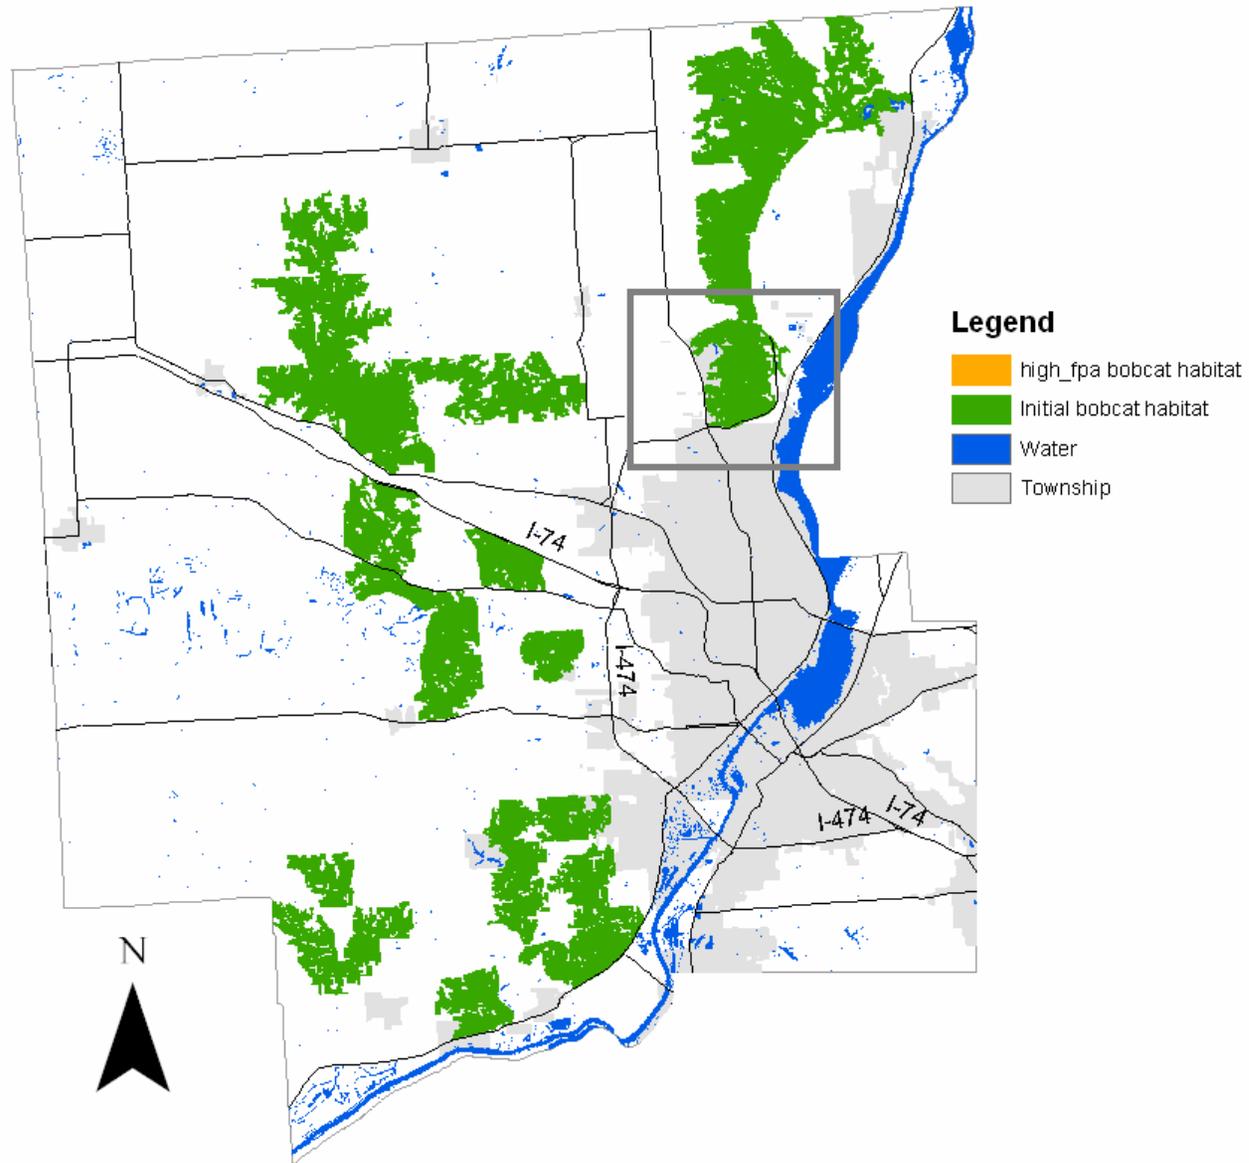

# Current Bobcat Habitat

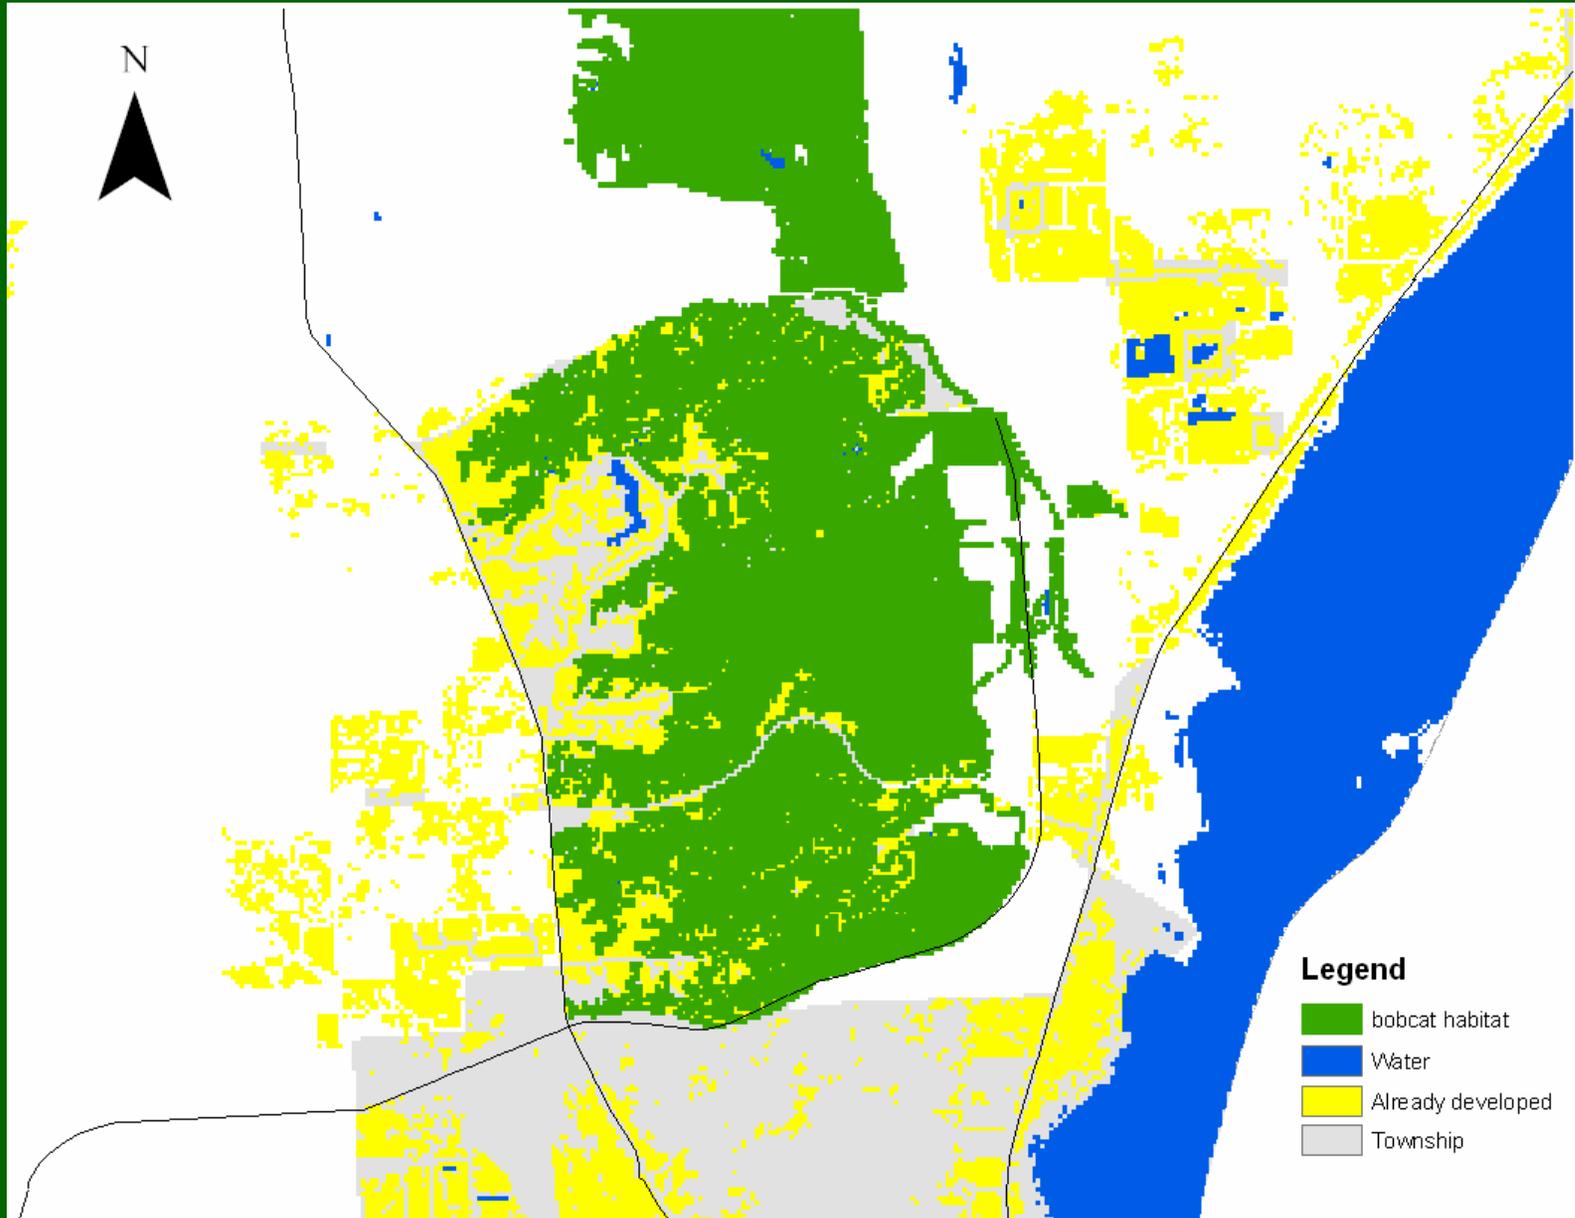

# Future Habitat (FPA scenario)

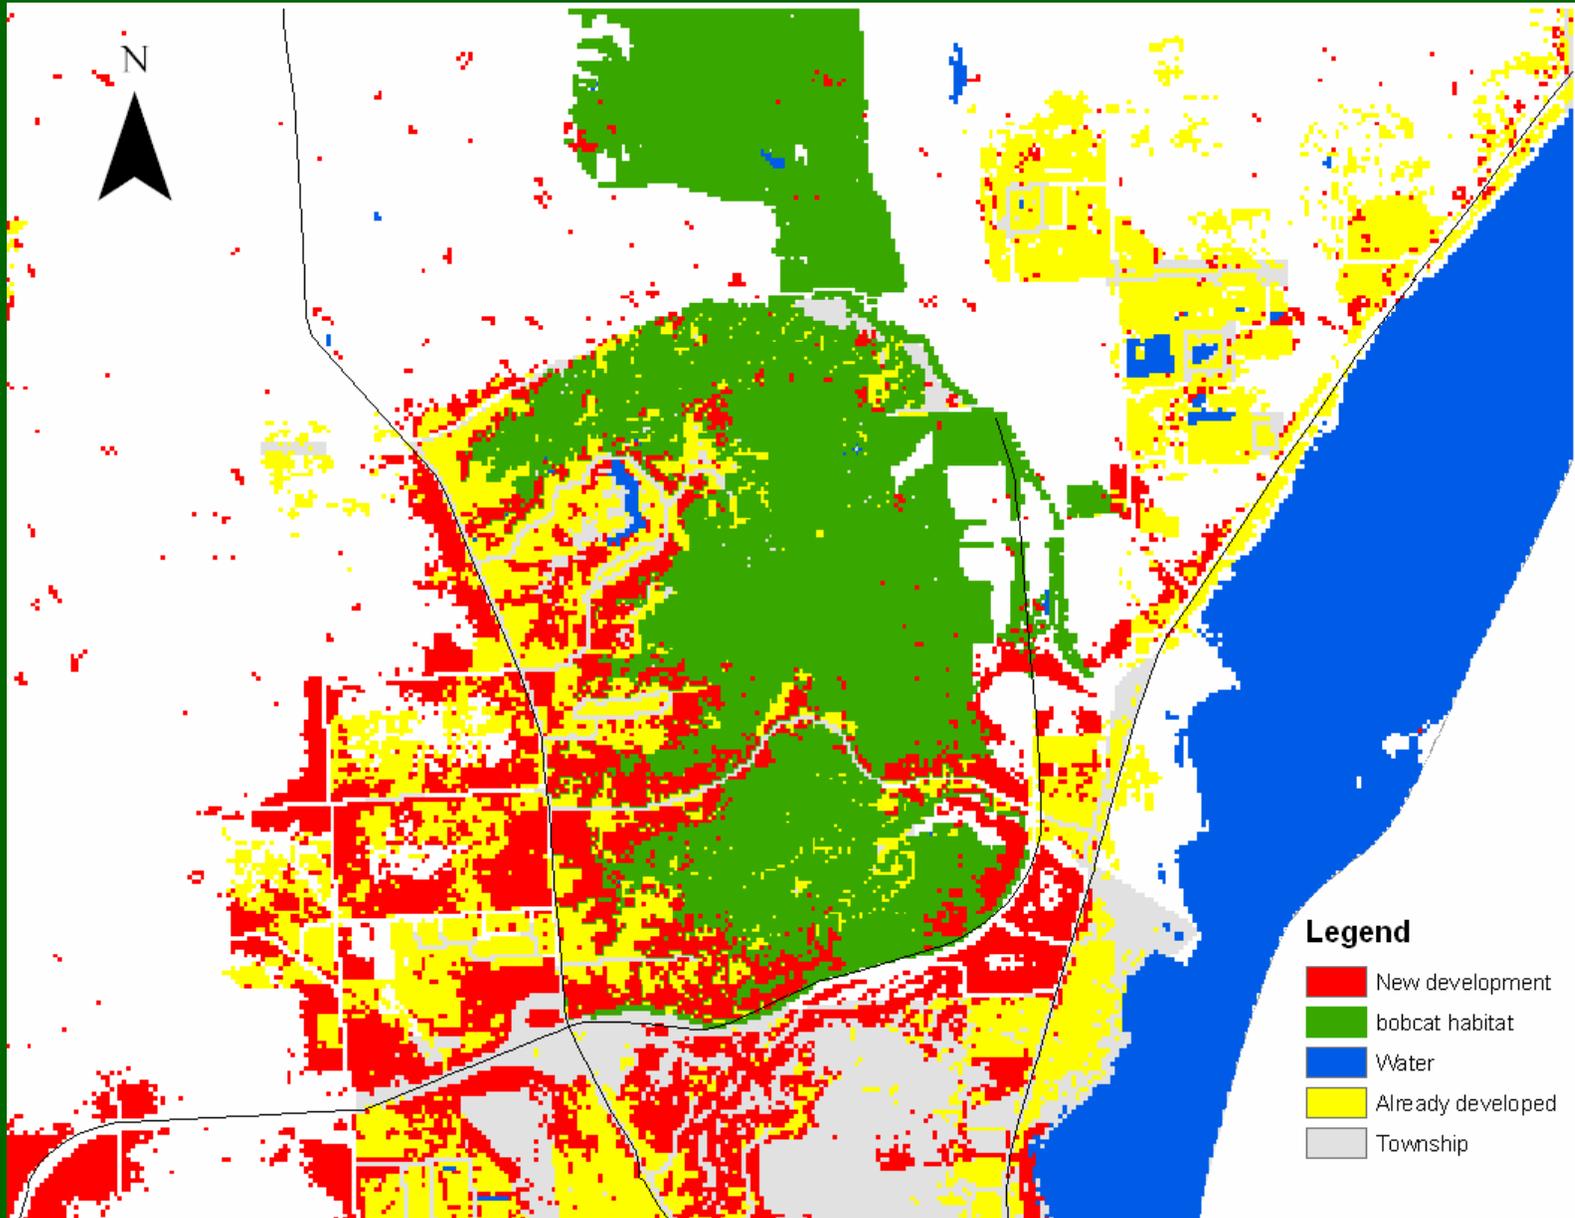

# Result in Detail

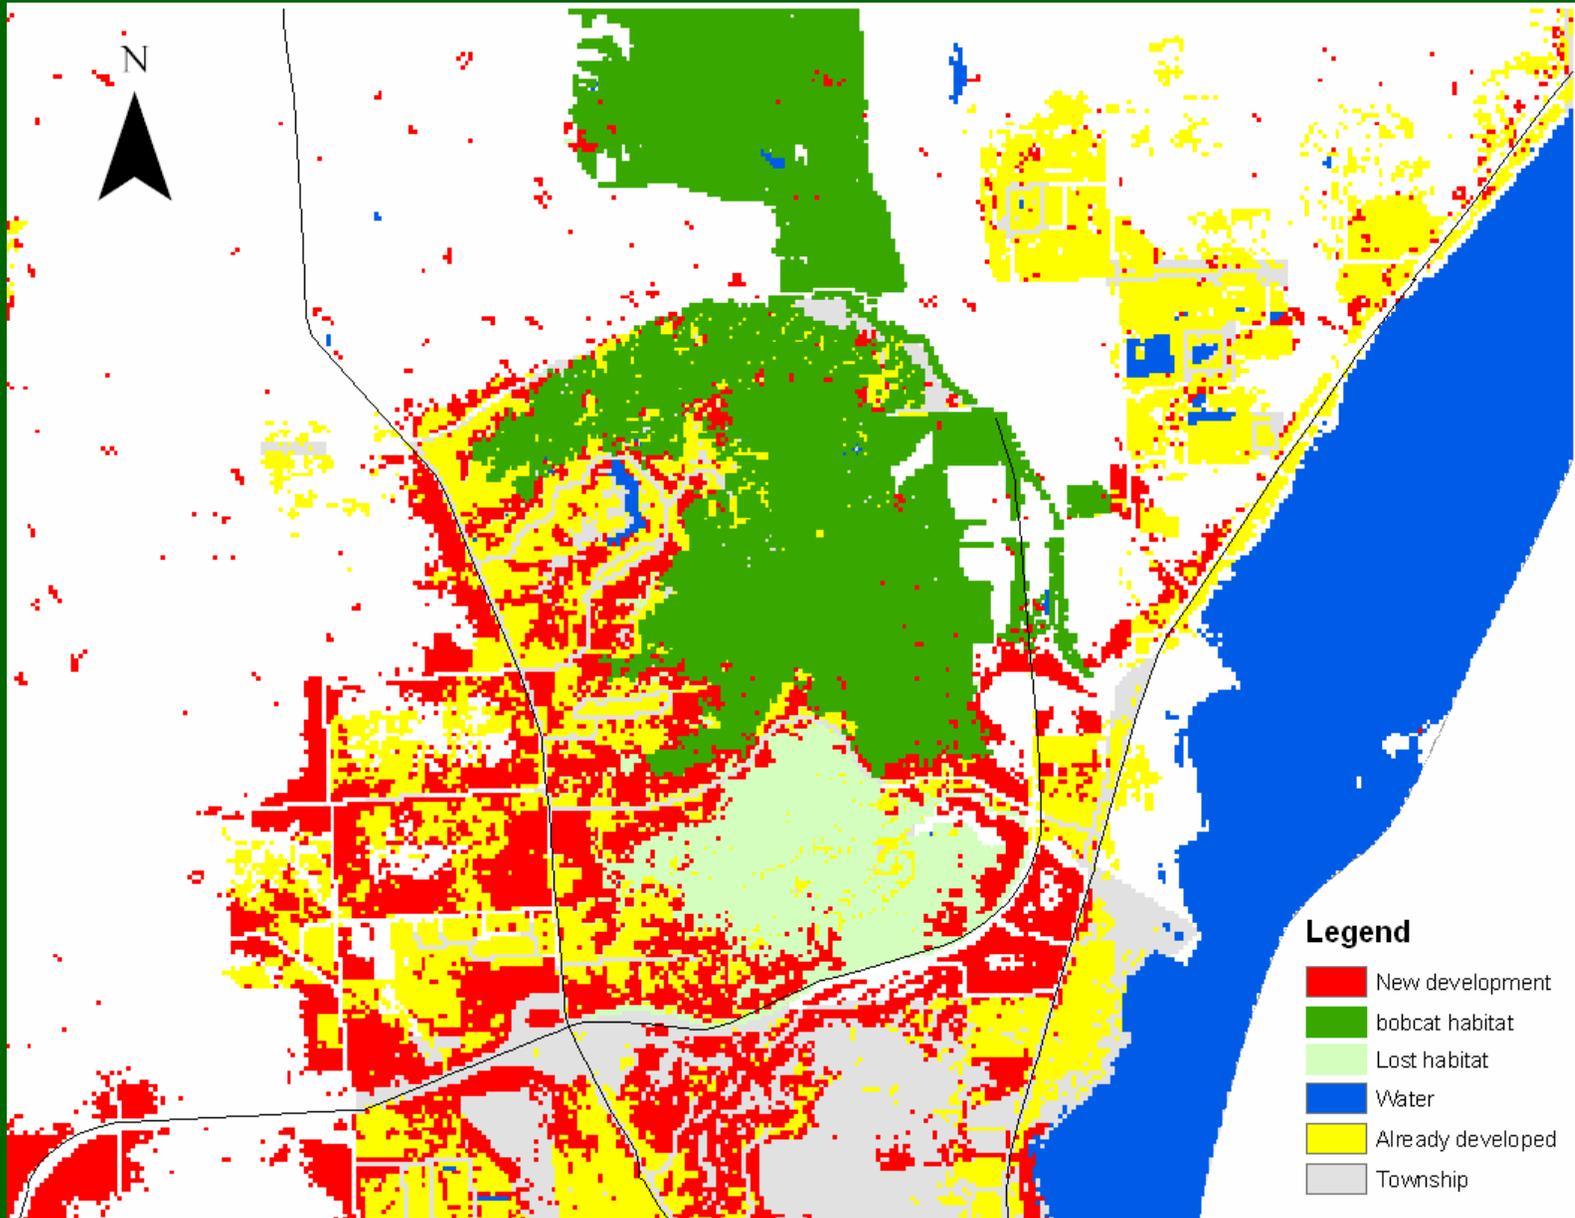

# Result in Detail

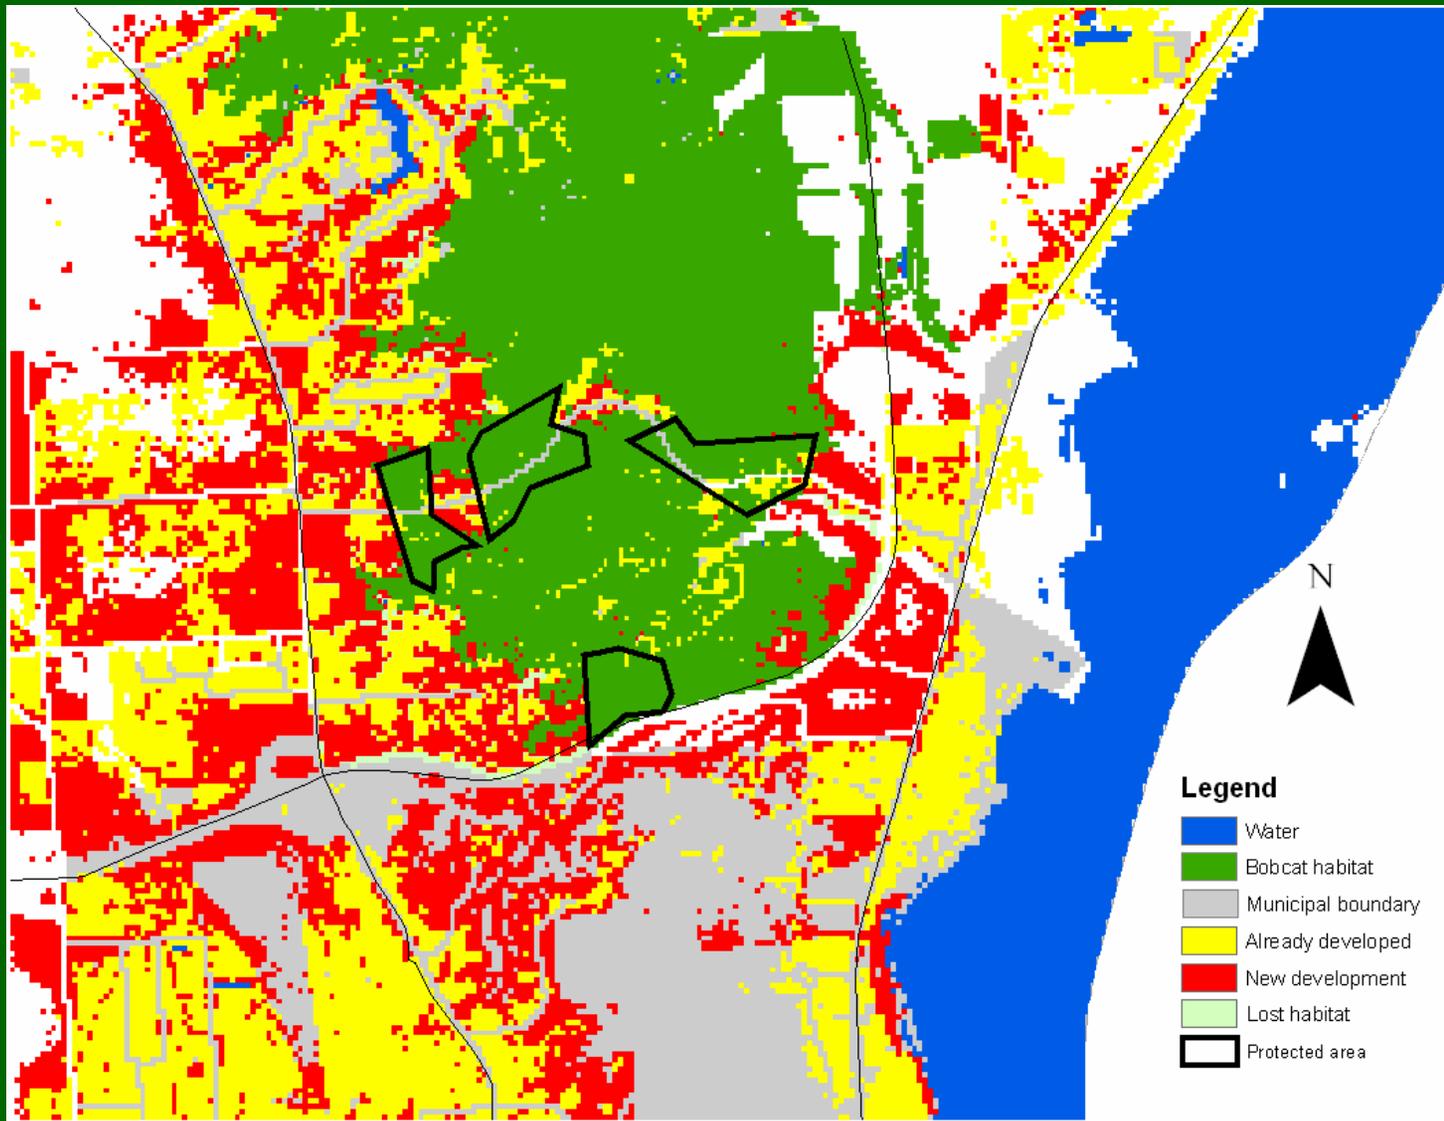

# Result in Detail

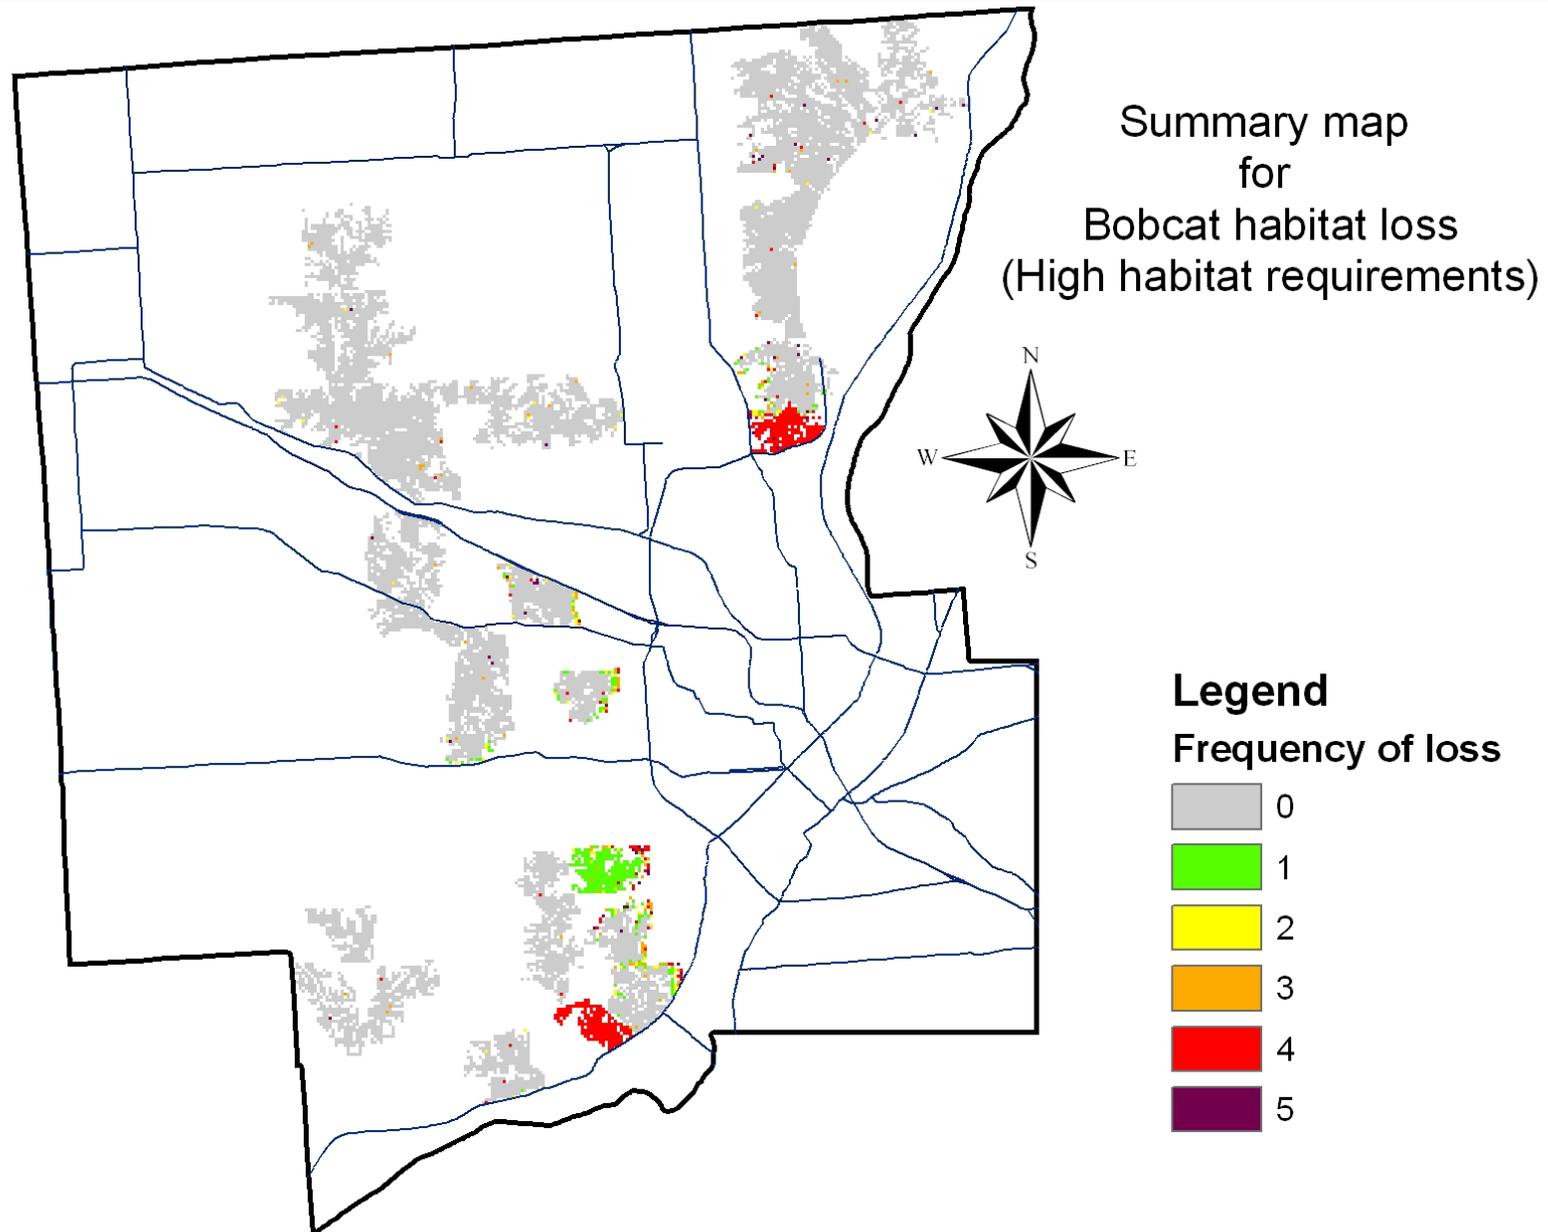

# Result in Detail

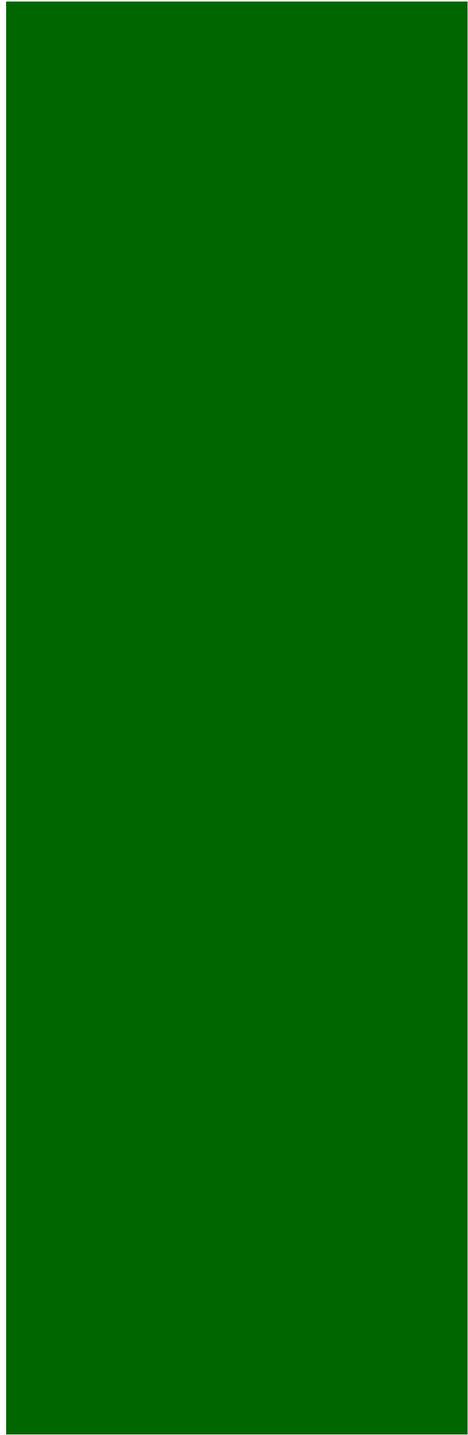

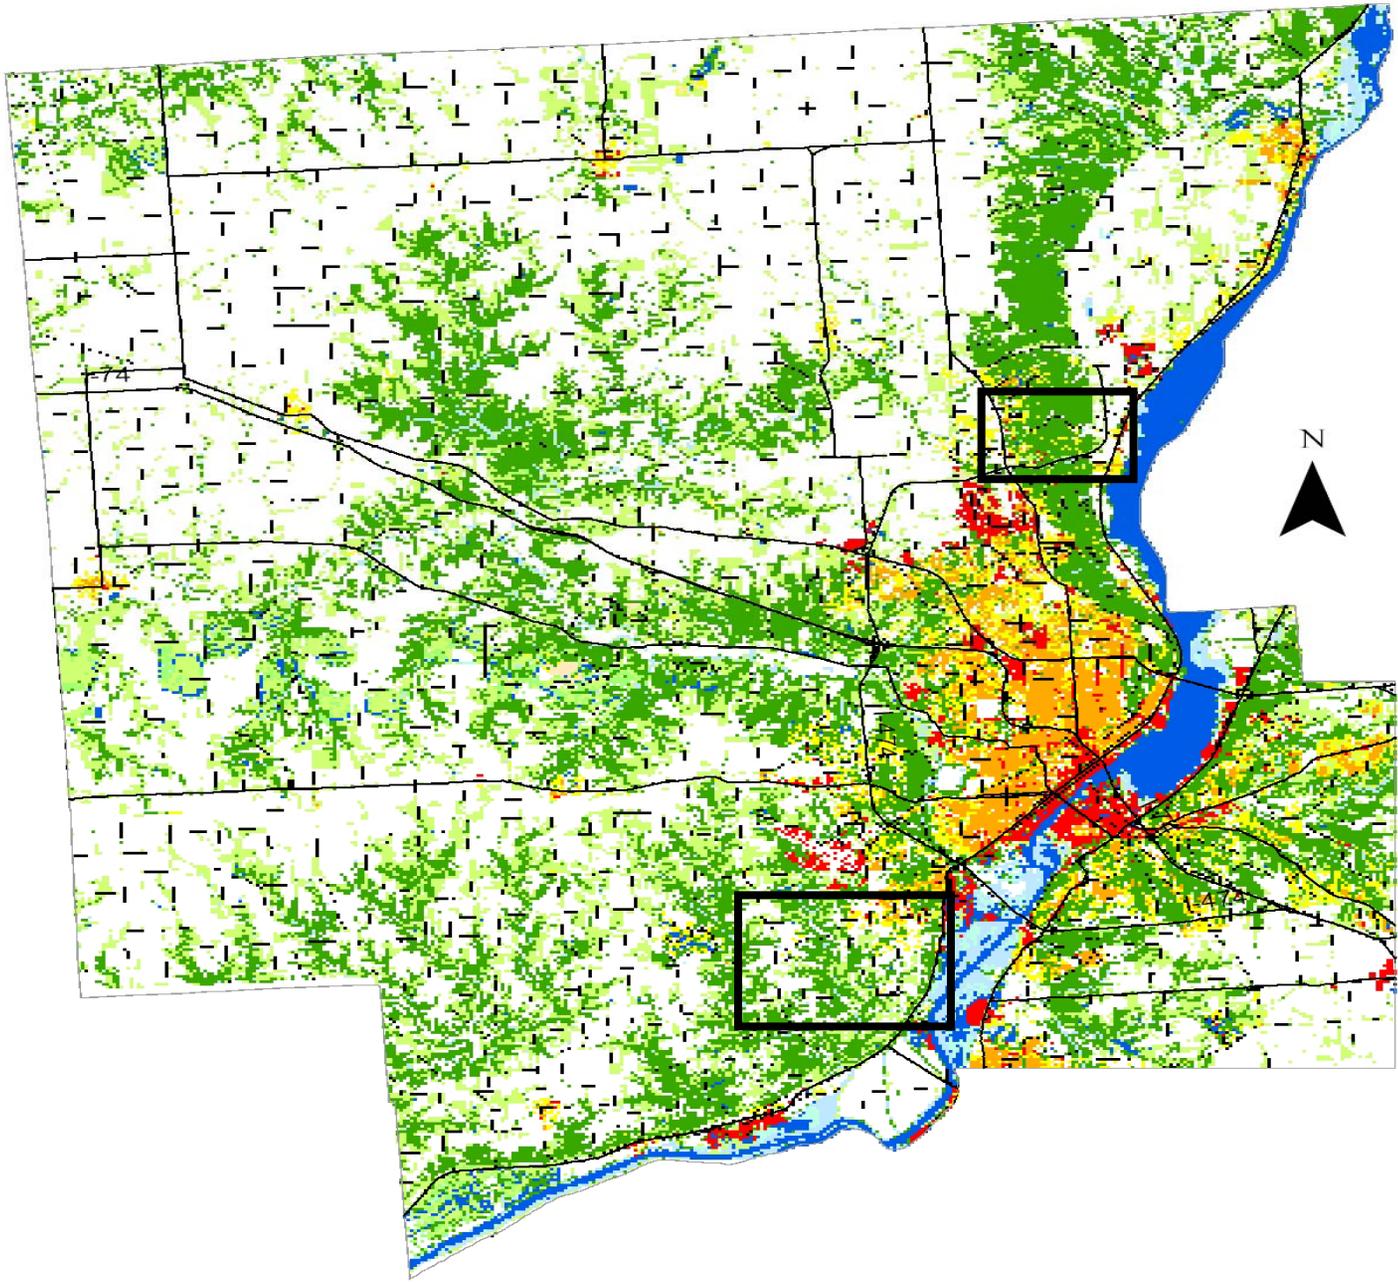

# Habitat Protection-Sustainable Development

# Threatened Areas

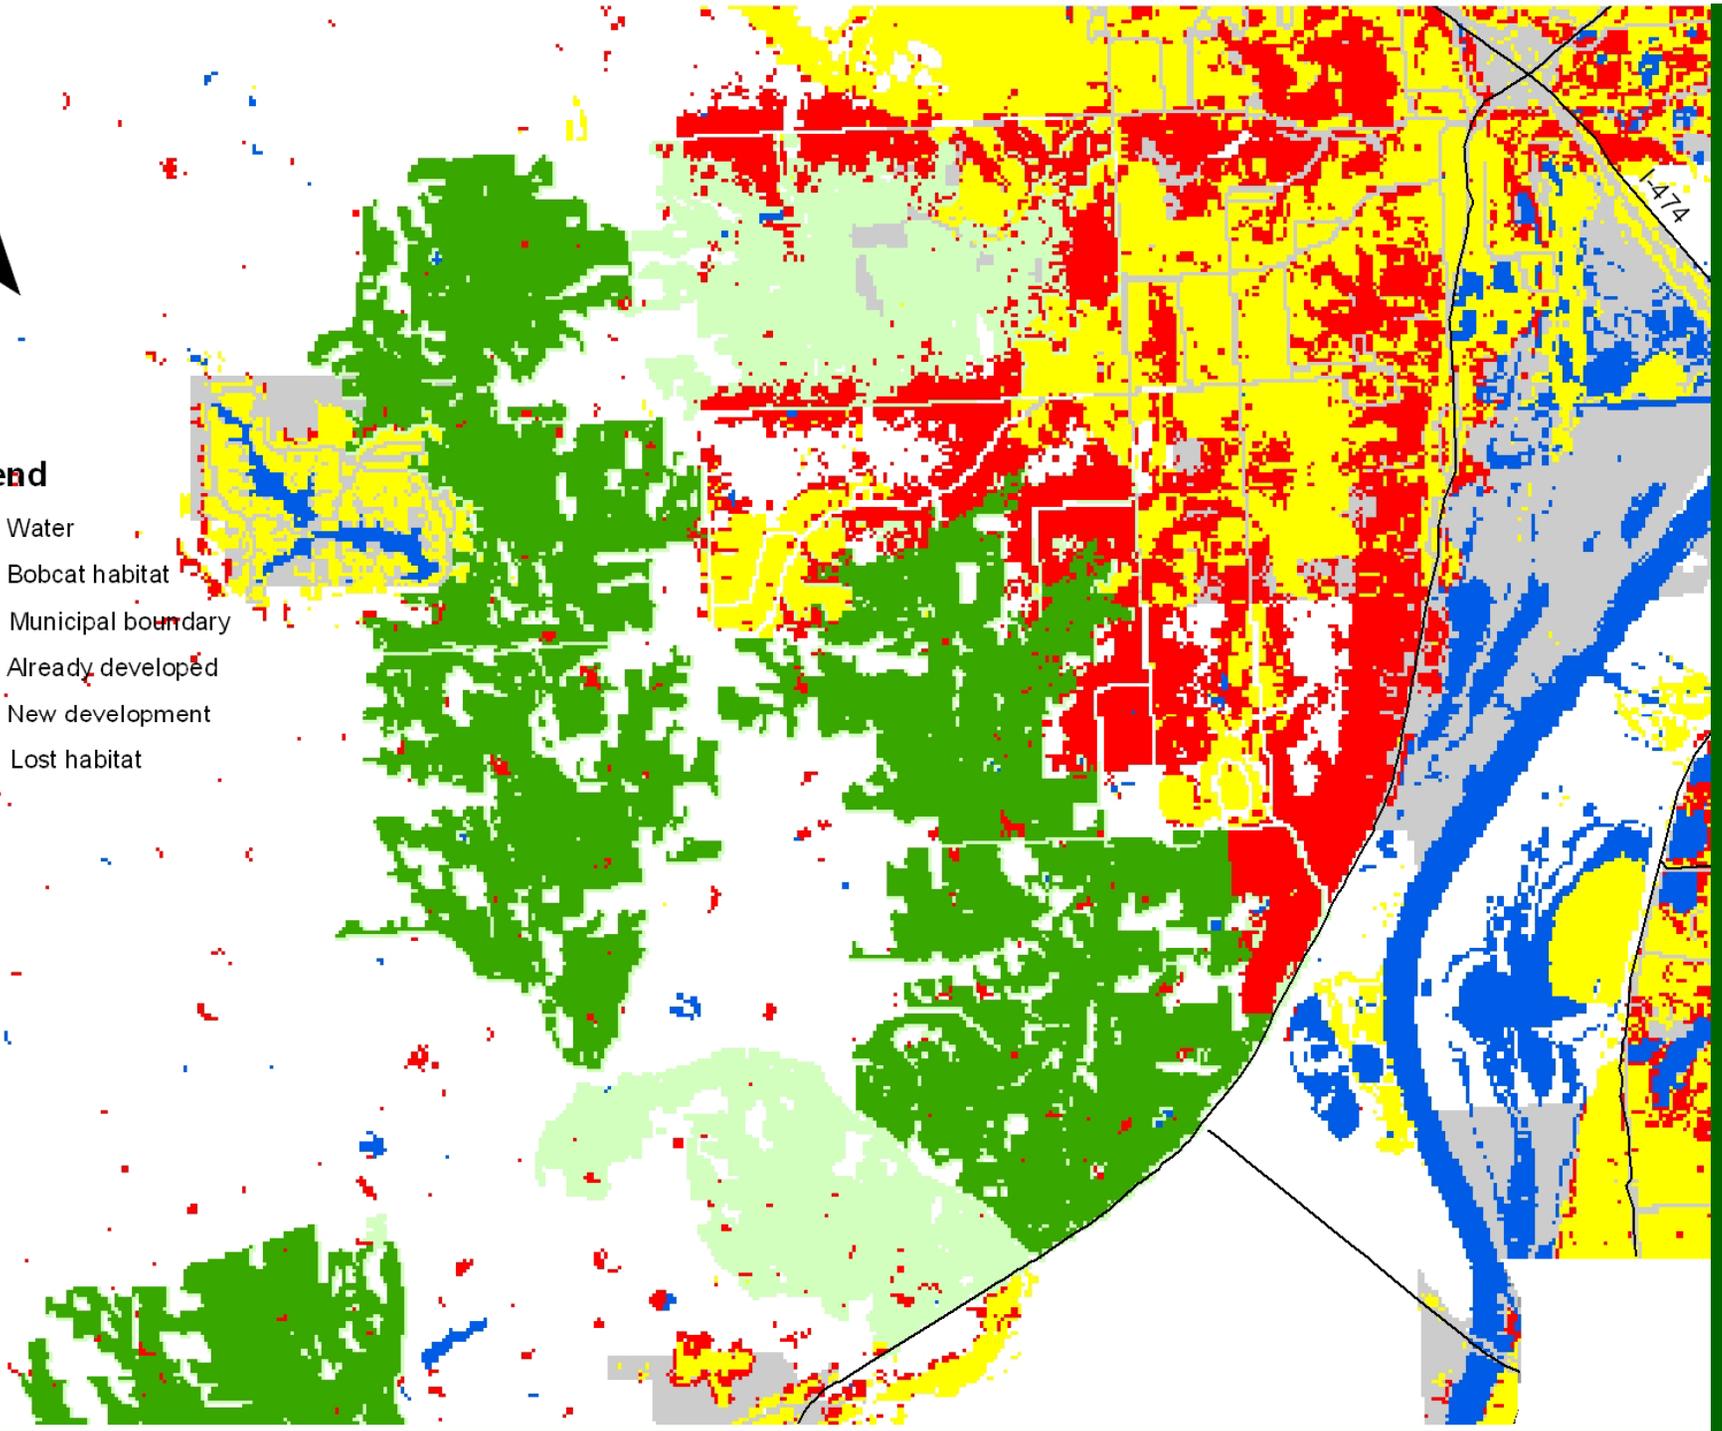

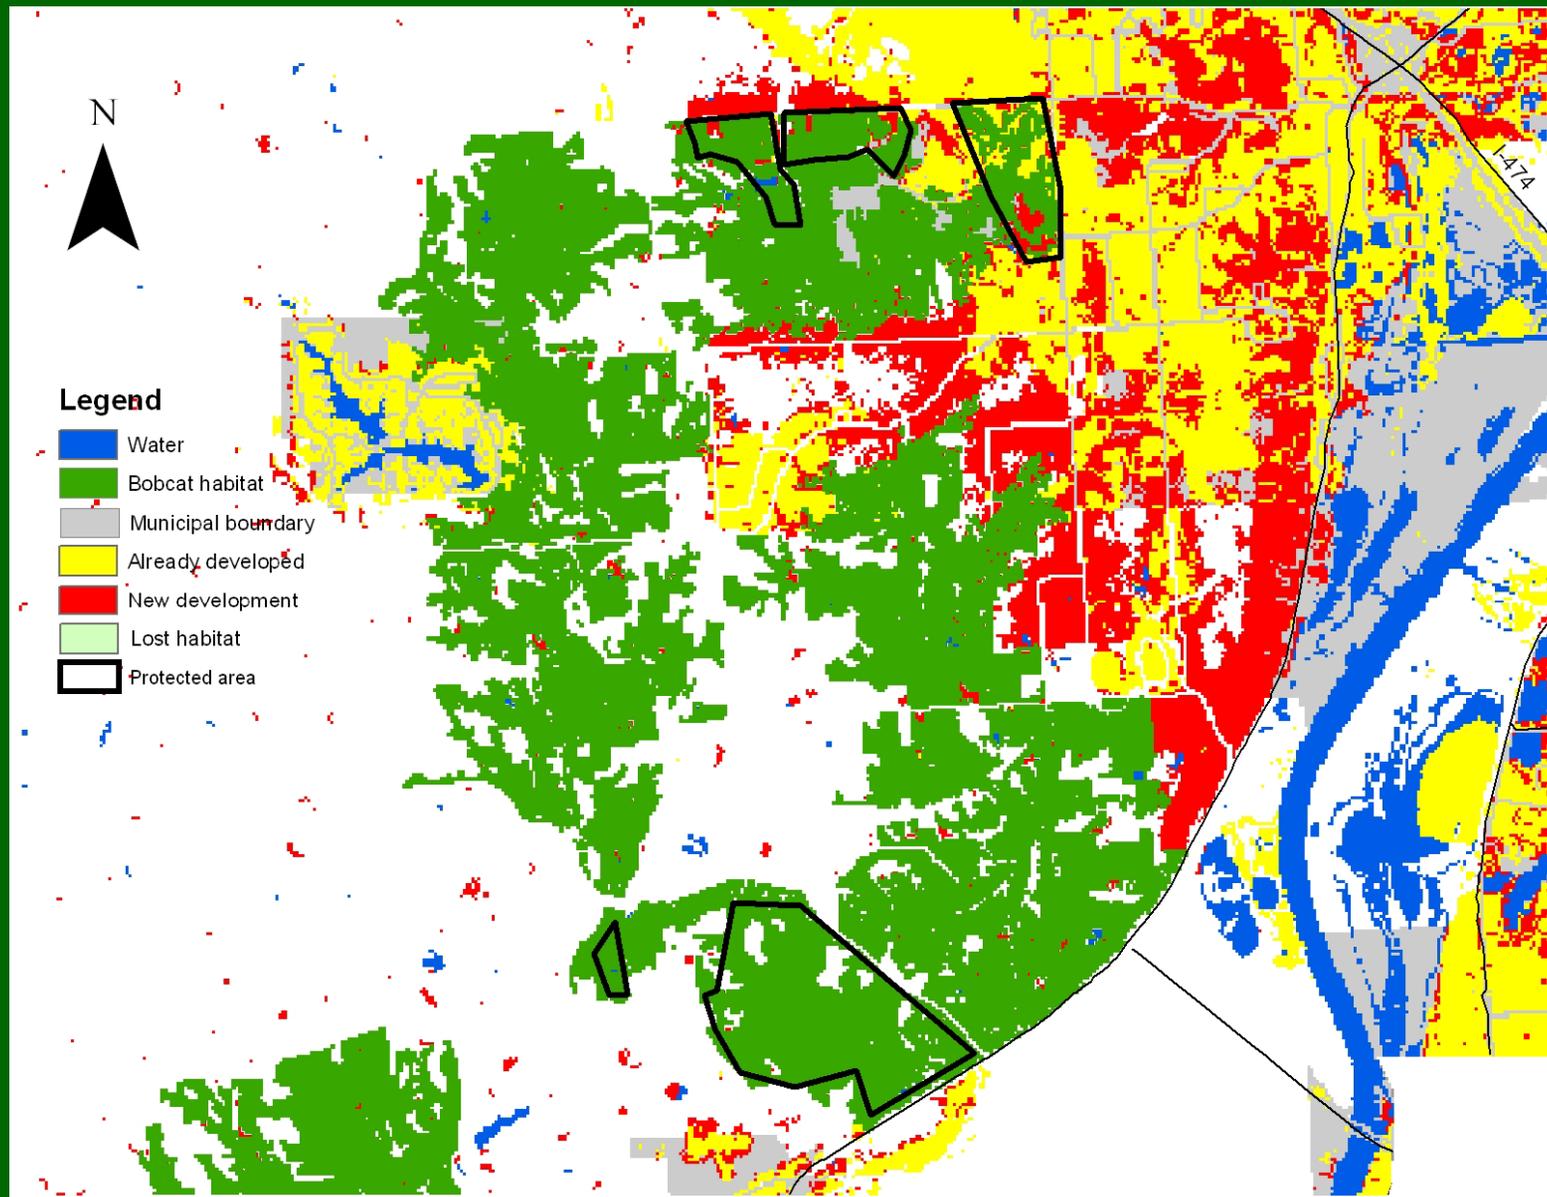

**Legend**

-  Water
-  Bobcat habitat
-  Municipal boundary
-  Already developed
-  New development
-  Lost habitat

# Habitat Protection/Sustainable Development

# Tier Development & Stats

## Tier 1:

- Area: 71,839.55 acres
- Parcels: 8,459
- Land Use: mostly R1, in addition: A1, A2, C1 & C2 (few parcels), I1, I2, R1 & RR
- Parcels with 50% of Tier 1 coverage or more:

# Tiers Stats

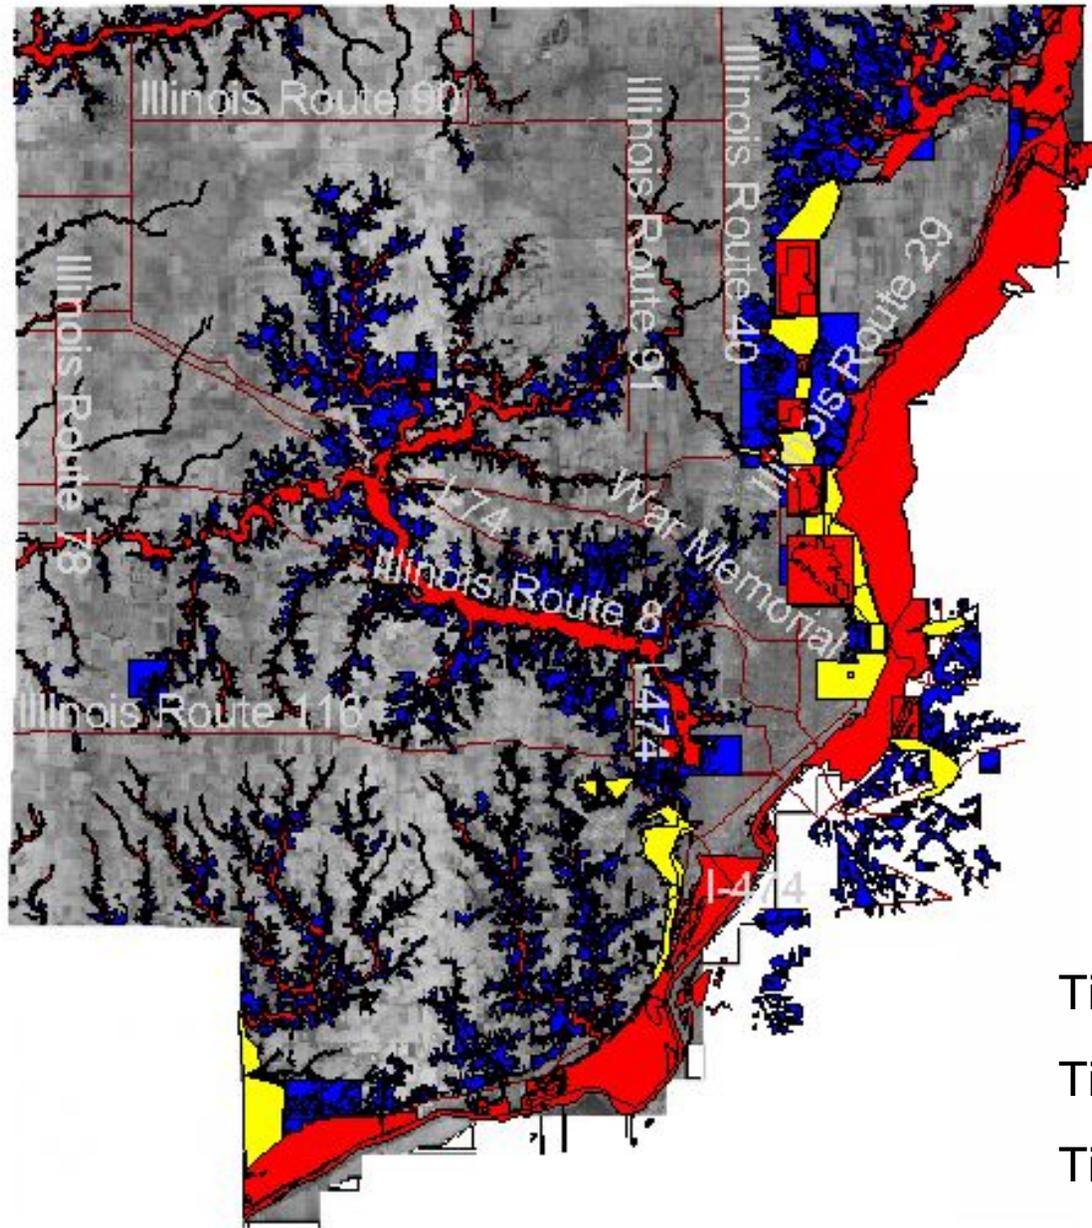

## Tier 2:

- Area: 10,517.05 acres
- Parcels: 5,049
- Land Use: Mostly A2 & R2, in addition: A1, C2 (only 1 parcel), I2 (2 parcels), R1 & RR

# Tiers Stats

## Tier 3:

- Area: 63,413.09 acres
- Parcels: 21,566
- Land Use: the majority is A2 & R2; in addition to A1, R1, few parcels in C1, C2, I1, I2, RR & 17 parcels in R3

Tier Map

Tier 1 = Red

Tier 2= Yellow

Tier 3= Blue

# Land Categories & Initial Recommendations

- 1<sup>st</sup> Tier:

Open Space by INAI sites and on floodplain

- Remain in natural state: Conservation Easements, Land & Water Reserves, Open Space County Ordinances

- 2<sup>nd</sup> Tier:

Areas linking above hubs, allowing connectivity

- Recommendations:
  - Large Lot Development
  - Conservation Development
  - Natural Drainage

# Land Categories & Recommendations

- 3<sup>rd</sup> Tier:

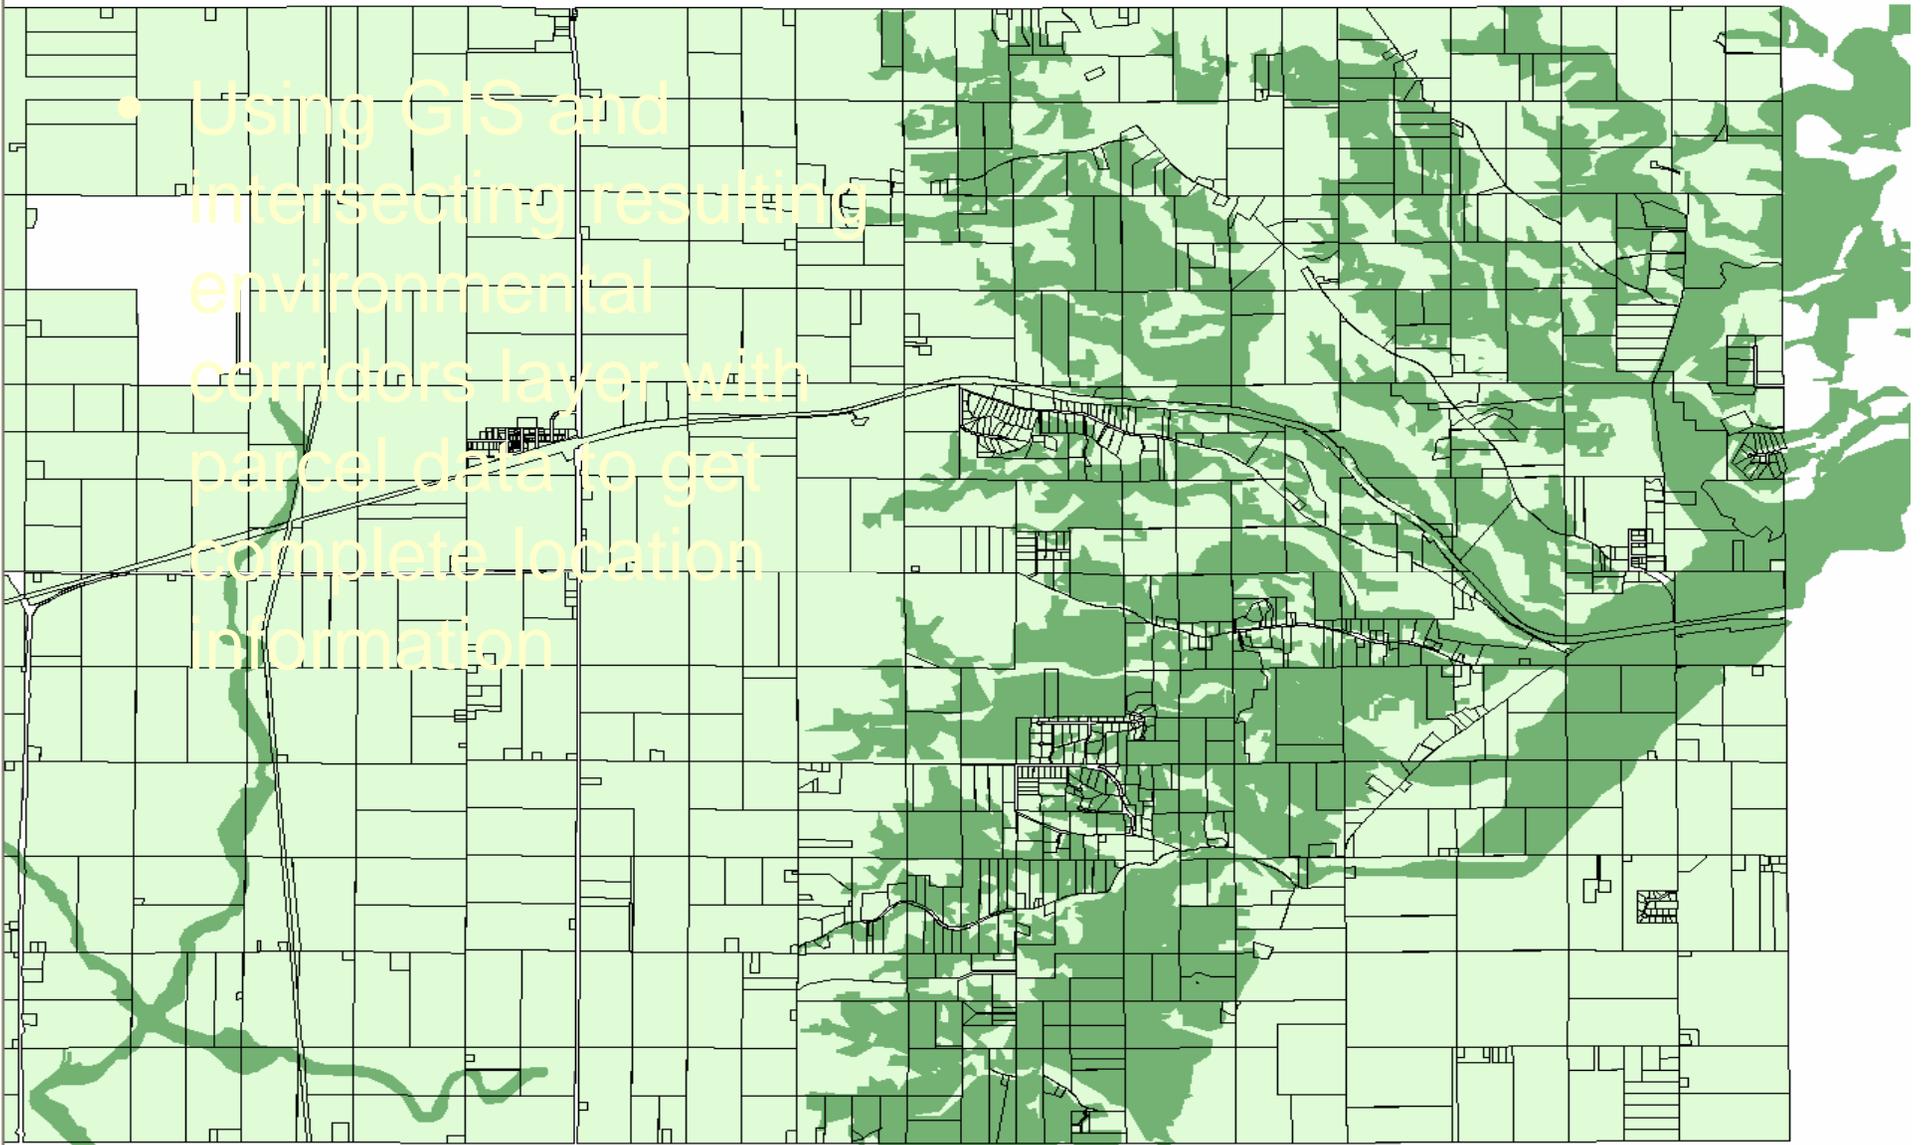

Sites in environmental corridors zoned or planned for development

- Recommendations:

- Stormwater Detention
- Natural Landscaping
- Floodplain Protection
- Topsoil Protection

# Location Information

- Using GIS and intersecting resulting environmental corridors layer with parcel data to get complete location information

# Deliverables & Next Phase

- Educational map of the Environmental Corridors + Website
  - [www.tricountyrpc.org/environmental/corridor.htm](http://www.tricountyrpc.org/environmental/corridor.htm)
- Land Use Guidelines
- Local Legacy Plan- Corridor Expansion
- Peoria County Environmental Corridor Ordinance- Transforming Tier Recommendations into formalized ordinance
